

Hunter Chen

hello@hunterchen.ca

hunterchen.ca | github.com/hunterchen7 | linkedin.com/in/hunterchen

Key Skills

- **Languages:** TypeScript, JavaScript, Python, Rust, C, HTML/CSS, SQL (Postgres & SQLite)
- **Technologies:** React, React Native, Next.js, Expo, Node.js, Vite, WASM, AG Grid, Playwright, AWS

Work Experience

Software Engineer | Geneial Oct. 2025 - Jul. 2026

- Built AI chatbot interface with real-time streaming and retry logic; deployed FastAPI backend to AWS EC2 using Bedrock for LLM inference, FAISS for RAG, and DynamoDB for context retrieval
- Migrated build toolchain to Rust-based bundler, reducing JS bundle size by 32% and build times by 93%
- Architected autonomous self-healing testing system using Claude Agent SDK and Playwright MCP, generating 110+ E2E cross-domain multi-user tests across 40+ routes, reducing production errors by 19%

Software Engineering Intern | Geneial Jun. 2024 - Oct. 2025

- Built a deferred deep linking and referral system for iOS and Android, increasing conversion by ~25%
- Implemented server-side pagination and memoized rendering on data grids, improving load times by >30%
- Engineered WebAssembly bridge enabling client-side FHE and AES encryption on React Native mobile app
- Migrated core web app from Create-React-App to Vite, reducing build times by up to 78%
- Integrated multilingual (i18n) support with compile-time validation across 80+ screens on mobile app

Founding Engineer | aramid.finance Jan. 2022 - Sep. 2022

- Built v1 web app and landing page for a blockchain cross-chain protocol using TS/React (Next.js, Zustand, Tailwind), securing a \$150K grant and facilitating over \$1.2M in transaction volume

Volunteering

Hack Western - Western University's Flagship Hackathon | 2025.hackwestern.com Apr. 2024 - Nov. 2025

- Led a team of 6 developers to build web platform for student hackathons with 400+ attendees
- Architected and implemented promo site with a custom-built React canvas, served to 50,000+ visitors
- Spearheaded development of mobile-first responsive application portal, served to 1800+ applicants

Projects

ti84ce - Cross Platform TI-84 Plus CE Emulator | Rust, TS/React, Kotlin, Swift github.com/hunterchen7/ti84ce

- Engineered cycle-accurate TI-84 Plus CE emulator in Rust, with a full implementation of an ez80 CPU supporting 256+ opcodes with 24-bit addressing and mixed-mode execution
- Cross-compiled Rust core from a single codebase to deploy on web (WASM), Android (JNI), and iOS (C FFI)
- Developed chess engine achieving ~2100 Elo on <50 KB RAM & 48 MHz ez80 CPU with negamax search, null-move pruning, transposition table, Zobrist hashing, and Texel-tuned evaluation (~2700 Elo on PC)

play-lc0 - Browser AI Chess Platform | React, TypeScript, ONNX <https://github.com/hunterchen7/play-lc0>

- Built web application to run 50+ chess engine neural networks locally in browser via WebGPU/WASM
- Developed tournament system with live concurrent games and an engine scheduler with idle eviction
- Architected transfer learning pipeline in TensorFlow to fine-tune existing models on 2000+ personal games

deChess - Peer-to-Peer Chess Platform | React, JavaScript github.com/deChess/deChess

- Created a decentralized chess web app over a 4-week hackathon, receiving \$11,000 in prizes and grants

Education

- **Western University | BSc. Computer Science** Sep. 2022 - Oct. 2025
 - **Extracurriculars:** Hack Western Organizer & Team Lead, GDSC Exec, Western Climbing Club VP
